BUILD LOYAL CUSTOMERS AND BETTER MANAGE YOUR RESTAURANT WITH RELIABLE POS TECHNOLOGY

You face tough competition. New concepts and new restaurants present your customers with a virtually unlimited number of choices. How do you consistently deliver the exceptional level of service that ensures your customers keep coming back? The Sharp UP-X300 Point-of-Sale (POS) was built specifically to help you tackle this and other critical challenges by delivering powerful, easy-to-use features, unmatched flexibility and proven reliability all at a low cost of ownership.

Powerful service features, like advanced table management with reservations, guest check tracking, split checks, and preprogrammed promotions help you deliver quality, consistent service while reducing server training time. Capabilities such as inventory and cash management and liquor dispensing compatibility provide stronger controls over inventory stock and cash, enabling you to reduce key operating costs. The Sharp system is very flexible with highly configurable menus and screen layouts for bar and restaurant so it adapts easily to your way of doing business. With Sharp's proven POS reliability, there are less service interruptions in your business, and redundant data backup to protect your valuable information.

Delivered and supported by our authorized dealers, these exceptional features are standard components of an integrated software and hardware package from Sharp. The brand you know and trust to deliver the best in POS technology.

Features & Benefits:

Easily Customize Solutions:

- Pre-programmed support of daily specials, promotional pricing and more
- Liquor dispensing, compatible with Berg Liquor systems, offers integrated control of liquor stocks
- Peripheral and software interfaces - remote kitchen printers, EFT systems, cash drawers and more

Improve Customer Service:

- Enhanced graphical user interface on a bright 12.1-inch LCD touch screen offers exceptional ease of use
- Advanced table management with graphical floor layout shows table attributes and real-time status
- Integrated reservations supported directly on POS
- Easy lead-through order entry speeds service and reduces errors
- "Drag-and-drop" check and item splitting speed bill settlement

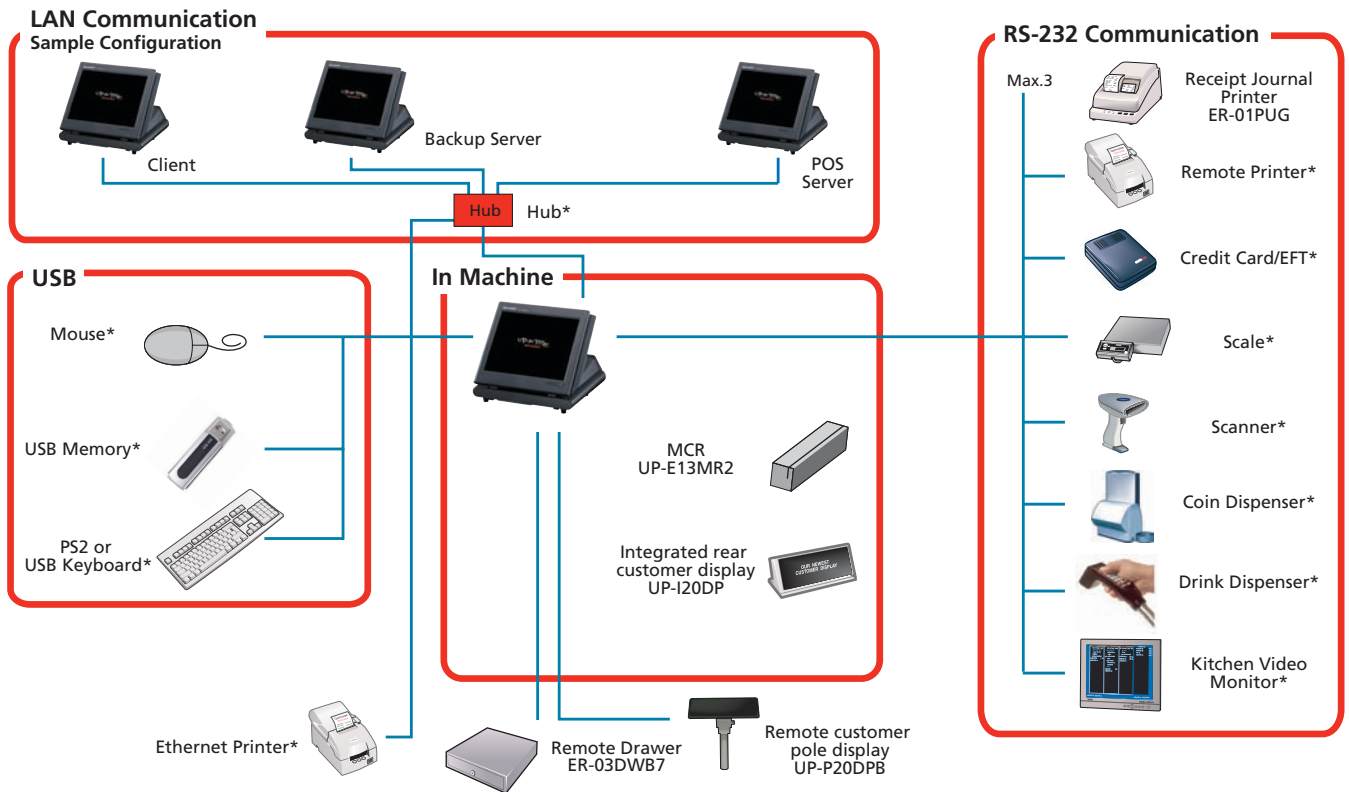

Better Manage Operations:

- Redundant backup data files help preserve valuable information
- Guest check tracking enables quick and accurate guest transfer from bar to table
- Server checkout
